# STOTZ EQUIPMENT

# We Make Your Life Easier.

**The Stotz Equipment Difference:** Stotz Equipment has been family-owned and operated since 1947. Single family ownership has helped to create a consistency of service and a commitment to our customers that is unmatched by our competitors. When doing business with Stotz Equipment, you have access to the combined knowledge of nearly 400 employees in 25 locations across 8 states. Additionally, many team members participate in industry groups across the country, in an effort to bring our customers the best solution to their business and personal equipment needs. Simply stated, **WE MAKE YOUR LIFE EASIER!**

**Service:** All Stotz Equipment locations service the brands we sell and many we don't. All of the shops are staffed with Factory Trained Technicians. These technicians can provide anything from basic maintenance to the most sophisticated diagnosis and repairs. Whether in our shop or at your location the Stotz Equipment's team of technicians can keep your equipment running so it's ready to work when you are. We can also set up service and maintenance contracts for any equipment or fleet no matter the size.

**Parts:** At Stotz Equipment we have one of the most extensive parts inventories in the industry. It's more than likely the part you need will be in stock. If not, we're usually be able to have it for you the next day. Of course we stock most parts for all of the brands we sell. In addition we can also access parts to many brands we do not. At Stotz Equipment we can also offer the flexibility of onsite parts stocking so the part you need will always be at your fingertips.

**Finance:** Stotz Equipment has finance options for most purchases. We can offer a variety of revolving, installment and net 30 plans as well as flexible payment options on approved credit. At Stotz Equipment we can help make John Deere ownership a reality for almost any budget.

**Extended Warranty:** We can offer extended warranty for most agricultural, commercial and residential equipment purchases. For a small investment, extended warranty provides piece of mind and guarantees consistent cost of ownership. Plans are provided by John Deere so there is no risk and are fully transferable.
