

JOHN DEERE

Z370R Electric ZTrak™ Mower

Ride With Us to an Electric Tomorrow

HOW IT WORKS

Z370R

Intuitive Controls:

Integrated park brake is activated when the control levers are pushed outward. Power button quickly turns on machine

Operator Display:

Large LCD screen to monitor battery levels and three operator modes to adjust settings that fit operator preference and yard conditions

Fully Sealed Battery:

The Z370R comes with a sealed 3.2 kWh battery with an IP66 dust resistance rating – which means this machine can weather the conditions, be washed with a hose and stored outdoors

42" Accel™ Deep Mower Deck:

Offers no compromises in cut quality and performance when compared to a similar gas machine

By the Numbers

5

year, 200-hour battery warranty*

Up to

2

acres mowed on one full charge

0

operating emissions

**3-year, 200-hour machine warranty*

Charging Simplified

On-Board Charging

- Charge with standard extension cord and any household outlet
- Charge without removing batteries or using external charger to eliminate additional required storage space

Integrated Bluetooth

- Remotely monitor charge status and battery level through MowerPlus™ app

Smart Charging

- Smart technology ensures the battery is charged at the optimum speed and stops when it reaches full charge. This protects the battery and leads to maximum battery longevity

Mowing Electrified

- 20" custom-tailored seat with armrests, LED lights and a floormat for operator comfort
- Feel good about low environmental impact of ownership
- Durably-constructed large frames and side rails
- Optional attachments and accessories to customize your machine – including MulchControl™
- Mowing up to 7 mph (11 km/h) saves you time

Sustainable. Smart. Still True.

Discover the real, reusable power of the Z370R. When we designed this eco-friendly mower, we included the same John Deere performance you'd expect out of a gas-powered machine.

With a 42" Accel Deep mower deck, you will get the same quality in every cut you've come to rely on with John Deere mowers. We utilized durable construction by building large front and side rails* to increase machine endurance.

**Front rails are: 2.5"x2" (.06 m - .05 m); Side rails are: 2"x1.5" (.05 m - .04 m)*

Why It Works for You

All electric with zero emissions, this mower puts the “green” in John Deere mowing.

- Gasoline no longer required, saving you time... no trips to a gas station
- Reduced noise and vibration, compared to gas units, for improved operator comfort
- Engine oil changes, air filters, mower belts and greasing eliminated to reduce required maintenance
- Integrated MowerPlus app lets you monitor battery and charge status
- Same 42” Accel Deep mower deck used with the Z300 gas series

Stands Up to Mother Nature

Don't let a little rain or wet grass get in the way of your mowing.

- Sealed 3.2 kWh battery with an IP66 dust resistance rating
- Weather rainy conditions
- Can wash with a hose
- Able to store outdoors

Environmental Ingenuity

The Z370R is built on the Z300 series platform, so you can expect the same trusted, durable John Deere construction.

- Zero-turn mower easily maintains yards with low-stress operation, maintenance and increased operator comfort due to less noise and vibration
- Manage a beautiful lawn while feeling good about protecting the planet
- Take pride in a well-kept lawn due to cut quality and mowing performance
- Enjoy zero emissions so you can appreciate the smell of fresh cut grass

What's the Talk in MowTown?

"All I can smell is fresh-cut grass and trees. It's very nice."

"I notice that the build quality of this mower is solid. The comfort is top-notch, and the reliability looks like something that's going to last me a long time with very few problems."

"The speed of this mower is great. I love the torque of it; it's snappy. Gets up and rolls and the power is right at your fingertips."

"I love the simplicity of when you're done mowing. Pull in, park and plug the mower in. It's very convenient."

This Mower Kicks Gas

- No sacrifice in mowing experience compared to a gas mower
- Turn on a dime while maneuvering in and out of tight spaces
- Styling and appearance of John Deere's Z300 series family
- Same John Deere quality ride and operator comfort
- Intuitive operation and same durable 42" Accel Deep mower deck and frame construction as a gas mower
- Reliable machine with speeds up to 7 mph (11 km/h)
- Productivity and great lawn appearance

Attachments and Accessories

Optional add-ons that say, "Right on."

- Rear Bumper
- Material Collection System
- Dry Condition Kit
- MulchControl
- Utility Carts (7 cu ft and 10 cu ft)
- Grass Groomer – Striping Kit
- Seat Cover
- Boarding Step
- Mower Cover
- Foot Pegs
- Magnetic Hitch Pin

Operator Display

This one-of-a-kind display was designed with operator experience in mind and includes a large LCD screen for monitoring battery levels.

A secondary LCD display located on the foot platform also shows current battery level – giving you peace of mind.

Choose from three operating modes that give you a customized cut:

Low (Turtle Icon): Use for power speed applications, like trimming, maneuvering into garages

High (Rabbit Icon): For most mowing situations – mow up to 7 mph (11 km/h)

Bagging (Mower with Bagger Icon): Use for bagging attachment or side discharge in thicker grass

Sustainable. Smart. Still True.

At John Deere, we'll continue to think, design and build outside of what's expected – *to keep giving you confidence with every cut.*
